WWMF 100 Rules Tariff

Item 0170 Precedence of Rates

Section 01

Effective Jan/01/08

Unless otherwise provided, when a pricing program is published in this tariff or in any other tariffs published by Wiseway Transportation Services, such pricing program will take precedence over the full actual commodity or class rates published in WWMF207, WWMF300, WWMF500 or WWMF700 that would otherwise apply. When such pricing programs are in conflict, they will be applied in the following order of precedence:

- A. For Prepaid shipments:
 - 1. An outbound pricing program published for the account of the Shipper will take precedence over all other pricing programs.
- B. For Collect shipments:
 - 1. An inbound pricing program published for the account of the Consignee will take precedence over all other pricing programs.
 - 2. If there is no collect pricing program published for the account of the Consignee, an outbound collect pricing program published for the account of the Shipper will apply.
- C. For Third Party shipments (applies when bill of lading indicates a party other than the Shipper or Consignee or the Shipper or Consignee's freight payment processor as the payor of the freight charges):
 - 1. A pricing program published for the account of the Third Party payor will take precedence over all other pricing programs.
 - 2. A Third Party Payor pricing program will apply only when the Third Party is neither the Shipper nor the Consignee.
 - 3. All Third Party Payor shipments must be prepaid.

Definitions:

- A. Shipper - the party shown on the bill of lading at time of pickup as the party tendering, or the Shipper, of the goods.
 - B. Consignee - the party shown on the bill of lading at time of pickup as the party receiving the goods at destination.
 - C. Third Party Payor - the party shown on the bill of lading as the payor of the freight charges who is neither the Shipper nor the Consignee, nor the freight payment processor of either the Shipper or the Consignee.
 - D. Freight Payment Processor - a bank or freight payment agency designated to pay the freight charges on behalf of the Shipper, Consignee or Third Party Payor.
 - E. Pricing Program - any program created to apply in lieu of the Carrier's full actual commodity or class rates and charges published in WWMF207, WWMF300, WWMF500 or WWMF700.
